

Practical LCA Training Lab

A sustainability education resource for Universities

Life Cycle Assessment (LCA) is a leading-edge tool used globally for sustainable product design and assessing the environmental impacts of products and processes.

By incorporating EarthShift's renowned **Practical Life Cycle Assessment** training lab into your syllabus you will easily and affordably enhance your sustainability curriculum and give your students an advantage in their field.

Lighten your teaching load and enhance your course

Let EarthShift's Sustainability Professionals introduce your students to the LCA methodology and teach them practical skills for incorporating sustainability into their studies and their future careers.

Perfect in Any Discipline

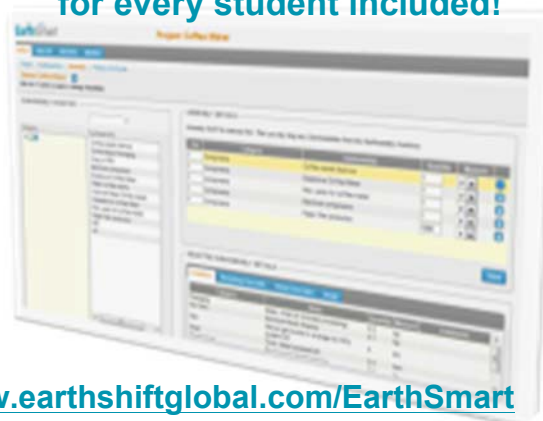

- **Engineering and Technical Programs:** students will learn to incorporate LCA into product and system design. This skillset will put them at the forefront of their field where Design for Environment is the way forward.
- **Environmental Studies and Sustainability Programs:** students will learn a deeper understanding of sustainability using life cycle thinking, and will gain a practical skill in their field.

Practical LCA Skills for Students

The curriculum will teach students to:

- Comfortably apply LCA in a practical project setting, such as product design decisions.
- Scope out LCA projects.
- Develop practical LCA models for products and processes.
- Have a better understanding of how LCA can be used effectively to achieve sustainability goals.

EarthSmart LCA software accounts for every student included!

www.earthshiftglobal.com/EarthSmart

Supplement your course syllabus with the *Practical LCA Training Lab* next semester!

The training is offered in two convenient formats -You choose what is best for your students

Pre-recorded Modules

Students download training modules and watch at their convenience.

Organization: Students are given a user name and password to access the online modules and provided with access to EarthSmart enabling them to follow course exercises and begin to design and analyze their own LCA models.

Price: \$175 per student, \$1,000 per semester for classes up to 30 students

Live Interactive Online Sessions

Online sessions are scheduled at your convenience. Choose either two 3-hour sessions or four 1.5-hour sessions. *Minimum of 6 students*

Organization: An experienced EarthShift Global sustainability professional will lead students through LCA theory and practical LCA exercises in EarthSmart. Students will follow along in the EarthSmart software.

Price: \$500 per student

Both Formats Include:

- An EarthSmart LCA software license for all students to use for the semester.
- Well established curriculum taught by an experienced sustainability professional.
- Access to “weekly office hours” staffed by EarthShift Global’s LCA Analysts for answers to any questions on the EarthSmart software.
